Seeking a position with part-time availability at first, alongside my studies.

SUMMARY

- 3rd-year B.Sc. student in Computer Science & Neuroscience, honors program.
- AI & Full-Stack developer building LLM apps and agents with React, Node.js and Python.
- Develops software systems and AI projects, with a focus on integrations and automation.
- Excellent interpersonal skills and teamwork; leads people and projects (StandWithUs, IDF).
- Experienced in teaching, tutoring and professional training, in Israel and abroad.
- Native English and Hebrew speaker.

EDUCATION

B.Sc. Computer Science & Neuroscience, Bar-Ilan University 2024 - present

(Pursued alongside 400+ days of IDF reserve duty)

PROJECTS

Builds projects that use and integrate AI tools, all on my portfolio.
Nechita Raka, a multi-faculty student hub (CS, Neuroscience) with a RAG chatbot, 1,300+ visits.
Aside, a Chrome AI sidebar extension: 6 LLM providers behind a base class and factory.
Sommelier Bot, a Telegram AI agent for a wine cellar: label photos, voice notes, 4-model fallback.
CareerPredict AI, a parody quiz app with AI-generated magazine covers (React, Node/Express, OAuth).
Wolt Clone, a full-stack food-delivery app (React, Node.js, MongoDB), team of 2.

MILITARY SERVICE

Senior Battalion Medic & Medical Officer Coordinator, Gaza Division 2021 - present

Regular service 2021 - Aug 2024, reservist since (400+ days of reserve duty alongside full-time studies).
- Decision-making under pressure: led the medical response in mass-casualty events, in the field and in the division war room, making fast triage and evacuation calls.
- Leadership: led a medical unit that grew from 12 to 30+ people during high-intensity operations, running a regional clinic and several teams in parallel.
- Coordination: ran real-time medical coordination and logistics across units from the division war room.
- Training: trained medics and combat soldiers to give medical care in the field.

SKILLS

Python, JavaScript, TypeScript, React, Node.js, MongoDB, Java, C/C++, Git and Docker.
Hands-on with Claude Code, AI agents, MCP and LLM APIs (Claude, Gemini, OpenAI).
Anthropic certificates in Claude Code in Action, Claude Code 101, Claude 101, AI Fluency.
Manages projects and tasks end to end, independently or as part of a team.
Strong self-learner who picks up new material quickly.
