SUMMARY

3rd-year B.Sc. student in Computer Science & Neuroscience, honors program.
AI & Full-Stack developer building LLM apps and agents with React, Node.js and Python.
Develops software systems and AI projects, with a focus on integrations and automation.
Excellent interpersonal skills and teamwork; leads people and projects (StandWithUs, IDF).
Experienced in teaching, tutoring and professional training, in Israel and abroad.
Native English and Hebrew speaker.

EDUCATION

B.Sc. Computer Science & Neuroscience, Bar-Ilan University 2024 - 2028 (expected)

(Pursued alongside 400+ days of IDF reserve duty)

Python, JavaScript, TypeScript, React, Node.js, MongoDB, Java, C/C++, Git and Docker.

Builds projects that use and integrate AI tools, all on my [portfolio](#).

[Aside](#), a Chrome extension that adds an AI sidebar with 6 LLM providers to any page.

[Sommelier Bot](#), a Telegram AI agent that manages a wine cellar, with a 4-model fallback.

Wolt Clone, a full-stack food-delivery app (React, Node.js, MongoDB), team of 2.

MILITARY SERVICE

Senior Battalion Medic & Medical Officer Coordinator, Gaza Division 2021 - present

Managed several small teams in parallel, up to 30 people in total.

Led the medical response in mass-casualty events.

SKILLS

Hands-on with Claude Code, AI agents, MCP and LLM APIs (Claude, Gemini, OpenAI).

Anthropic certificates in [Claude Code in Action](#), [Claude Code 101](#), [Claude 101](#), [AI Fluency](#).

Manages projects and tasks end to end, independently or as part of a team.

Strong self-learner who picks up new material quickly.

Seeking a position with part-time availability at first, alongside my studies.
