SUMMARY

Third-year **Computer Science & Neuroscience** B.Sc. student at Bar-Ilan University, looking for a **student / intern** role in **Full-Stack, Frontend, or AI development**. I build and ship my own projects (web apps, a Chrome extension, AI tools) and pick up whatever stack the job needs.

EDUCATION

B.Sc. Computer Science & Neuroscience (dual major) | Bar-Ilan University | GPA: 85.09 Oct 2024 - present · expected 2027

Relevant coursework: Calculus (100) · Python Data Processing (98) · Linear Algebra (97) · Neuroscience (94) · **Data Structures** (93) · **OOP in Java** (92) · Advanced Systems Programming (C++/Node.js) · Computer Architecture (C/Assembly)

Academic Projects

Cognitive Background: Neuro-Data Analysis (team of 4) · [GitHub](#)

- Studied whether a child's **socio-educational background** predicts **math and reasoning** scores, using a real OpenNeuro dataset (56 subjects) and **hierarchical OLS regression**.
- My part: refactored the exploratory analysis from notebooks into **Python modules**, built the **correlation analysis** and visualizations, and wrote the project documentation.

Tech: Python · Pandas · NumPy · SciPy · Matplotlib · Jupyter

Wolt Clone: Full-Stack Food-Delivery App (team of 2, private repo, available on request)

- Owned the **React 19 web client** for a Wolt-style app: restaurant browsing, menu search, cart and checkout, order history, admin pages, and 273 frontend tests.
- Built the **Express** skeleton and **MongoDB** storage for restaurants, products and search, and co-wrote the Node client for a **C++ recommendation service** over TCP.

Tech: React 19 · Node.js · Express · MongoDB · React Native · Docker · JWT · C++

PERSONAL PROJECTS

Aside: AI Sidebar Chrome Extension | [site](#) [GitHub](#)

- Built a **Chrome extension** that adds a context-aware **AI sidebar** to any webpage, putting **6 AI providers** (Claude, Gemini, OpenAI, and more) behind one interface.
- Designed a **privacy-first** model: API keys and chat history are stored locally and never synced, and page text is sent only with the user's own prompts (and can be switched off).

Tech: JavaScript · Chrome MV3 · OOP design patterns · i18n / RTL

Wine Sommelier Telegram Bot | [GitHub](#)

- Built an **AI agent** on Telegram that manages a personal wine collection in a live Google Sheet: it reads label photos, adds and removes bottles, and infers intent from context before giving pairing and buying recommendations.
- Added retries with backoff and a **4-model fallback** chain after hitting Gemini rate limits and outages; 173 unit tests run in CI.

Tech: Python · Google Gemini API · Telegram API · Google Sheets · Vercel · GitHub Actions

Personal Portfolio | [live site](#) [GitHub](#)

- Built a **portfolio site** with an embedded endless-runner **game engine** written from scratch in **TypeScript OOP**.

Tech: React 18 · TypeScript · Vite · Tailwind · Framer Motion

CLR: Culinary Logic Repository | [GitHub \(in development\)](#)

- Building an **AI pipeline** that takes links, notes, voice and photos via Telegram, sorts them into restaurants, recipes or kitchen gear, and structures them in a searchable React web app.

Tech: TypeScript · Python · React · Groq API · Supabase · Telegram API · Vercel

MILITARY SERVICE

IDF Combat Medic & Medical Coordinator | Gaza Division

2021 - 2024 · *reservist since Aug 2024*

- Leadership under pressure:** led a medical unit that scaled from 12 to **30+ personnel** during high-intensity operations.
- Ownership & reliability:** ran real-time coordination and logistics in a divisional war room across multiple units.
- Problem-solving in real time:** managed high-stakes triage and evacuation during mass-casualty events.

What it brings to a team: calm decisions under pressure and stamina for long efforts.

SKILLS

Languages: Java 17, Python, C, C++, JavaScript, x86 Assembly

Web & Full-Stack: React, Node.js, Express, MongoDB, React Native, Tailwind CSS, Vite

Data & Analysis: NumPy, Pandas, SciPy, Matplotlib, Jupyter

Tools & Platforms: Git/GitHub, GitHub Actions, Docker, Chrome Extensions API (MV3), Render, Vercel, GitHub Pages

AI-Assisted Dev & MCP: Architecture, implementation, debugging, and code review. · **LLM APIs:** Claude, Gemini, OpenAI, Groq

Certifications: [Claude Code in Action](#) | [Claude Code 101](#) | [Claude 101](#) | [AI Fluency: Framework & Foundations](#)

LEADERSHIP & ADDITIONAL

StandWithUs Fellowship (2025): Selected for a competitive Israel advocacy and leadership fellowship; trained in public speaking, media engagement and cross-cultural communication.

Languages: Hebrew (native), English (professional proficiency)
